PROFESSIONAL SUMMARY

Aspiring software professional currently pursuing a Bachelor's degree in Data Science, with hands-on internship experience and a strong passion for learning and innovation. Possess a proactive attitude, excellent problem-solving abilities, and the adaptability to thrive in dynamic environments. Seeking an opportunity to contribute to organizational success while building a rewarding career in software development.

WORK EXPERIENCE

Data Analyst Intern

Mar 2026 – Apr 2026

Future Interns

Worked on Data Science & Analytics tasks under a structured internship program.Applied data analysis, visualization, and basic ML concepts to real-world problems. Gained hands-on experience through projects and guided learning modules. Developed problem-solving and analytical skills in a practical environment

Intern (Full Stack Development)

May 2026 – Jul 2026

Aditya University · Surampalem, IN

Developed full-stack hospital management and monitoring system to enhance healthcare operations in government hospitals, featuring patient registration, queue management, electronic medical records, appointment scheduling, pharmacy management, bed allocation, staff administration, emergency services, and healthcare analytics. Built secure RESTful backend with Node.js, Express.js, JWT authentication, and MySQL; created responsive React-based frontend for improved user experience.

EDUCATION

Bachelor of Technology, Data Science

2028

Aditya University

Intermediate: MPC

2024

Rishi Junior College

Percentage : 98.3 %

SSC

2022

Sri Chaitanya Techno School

Percentage : 95.5%

PROJECTS

Student Course Registration System

Developed a database-driven course registration system using JDBC and SQL, Implemented CRUD operations with validations to avoid duplicate registrations, Designed ER diagrams and relational tables for students, courses, and registrations

Student Attendance Dataset Analysis

Analyzed attendance and academic performance datasets from Kaggle to identify correlations; processed student exam and attendance data to derive performance insights supporting academic evaluation and reporting

Skin Care Recommendation System

Built a web application recommending skincare ingredients based on skin type and concerns; implemented frontend interface with React.js and backend logic using Flask; integrated frontend and backend using JavaScript Fetch API

Integrated Government Hospital Operations Monitoring System

Developed full-stack hospital management and monitoring system including patient registration, queue management, electronic medical records, appointment scheduling, pharmacy management, bed allocation, staff administration, emergency services, and healthcare analytics; built secure RESTful backend with Node.js, Express.js, JWT authentication, MySQL; created responsive React-based frontend for improved user experience

SKILLS

Java | Python | C | C++ | JavaScript | SQL | React.js | HTML5 | CSS3 | React Router DOM | Vite | Node.js | Express.js | REST API Development | JWT Authentication | MySQL | Pandas | NumPy | Git | GitHub | Postman | VS Code

LANGUAGES

Telugu — Native
English — Fluent

CERTIFICATIONS

Google Data Analytics Professional Certificate

Infosys Springboard Certifications in DBMS & Python.

Coursera certifications : Mathematical foundations and quantum mechanics essentials,Excel Basics for Data Analysis,Excel Essentials for Data Analysis,Agile Software Engineering,Database Management Systems,Fundamentals of Data Science

EXTRACURRICULAR ACTIVITIES & HACKATHONS

- Participated in several events organized by the college and through online platforms.
- Participated in hackathons, collaborating on team-based problem-solving and development challenges.
